

The Right Direction for Your Business

National Coverage

Regional Support

Local Focus & Care

Our Focus

We specialize in the selection, installation, training, and support of business software solutions with a focus on accounting. We are the largest authorized reseller of ACCPAC accounting software in North America with four offices in the United States. Our broad range of products and services make us a single source for all your system needs.

Our Goal

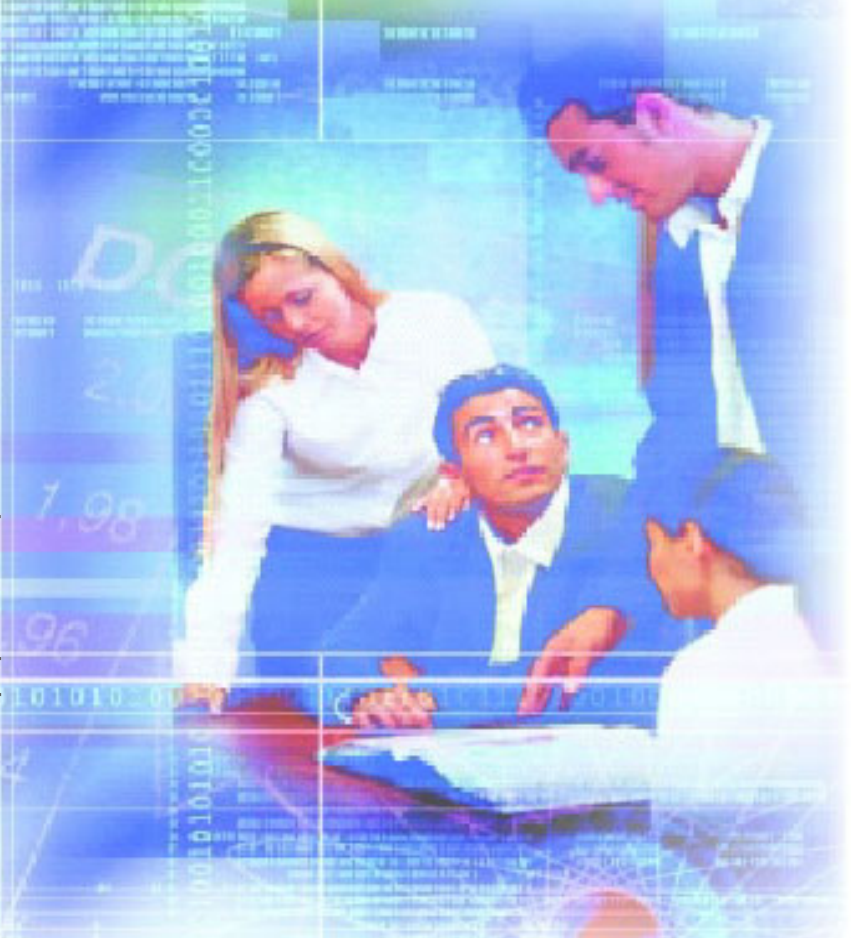

Our goal is to provide you with the absolute best level of service and support for your business information systems. Our desire is to form a long-term relationship with you by meeting or exceeding your expectations every time! At Forepoint, we strive to understand you and your business. It is through this understanding that we are able to meet the individual and specific needs of your company.

Our Staff

Forepoint staff members have degrees in accounting and business with an impressive list of credentials and a proven track record. This means that when you work with our Certified Consultants, you're working with some of the most highly trained professionals in this industry. Our group of specialists work together as a team to analyze your needs and implement a system to meet your specific requirements.

Our Results

At Forepoint we have been selling, installing, and supporting business software solutions since the mid 1980's. Our depth of knowledge and experience allows us to quickly and efficiently assist you with all of your company's information technology related issues. We are focused on proven software and technologies that really work for our clients. By providing a total system solution we can maximize the return on your computer software and hardware investment, and minimize disruption to your organization. We know our business and we can help yours to be more successful!

Training

If you're going to run a marathon, training is critical. Without it you stand little or no chance of ever crossing the finish line. The same principle applies to software implementations—the majority of failed systems are typically a result of inadequate training. That's why we put so much emphasis on high quality and structured training for every project.

We provide customized and relevant training that increases productivity and empowers an organization's workers. The training setting is as flexible as the structure. Forepoint professionals share their knowledge and expertise either one-on-one, or in small groups using our classroom training facilities, or those provided by the client.

Support

Our customer care team is made up of trained, helpful people who are ready with prompt, accurate, and intelligent assistance. At Forepoint we provide human contact in the sometimes harsh world of technology.

Custom Programming

Forepoint provides custom solutions by creating innovative software answers to our client's unique application questions. Drawing on an extensive library of reusable tools developed over many projects, our team provides tested solutions in a rapid development environment... all while staying within your budget.

Accounting & ERP Software

We are a leading solution provider of accounting and business management software. The Forepoint team helps our clients to choose among market-leading software. We want to make sure that your company selects the right system based on your current requirements, anticipated future needs, and your budget.
